

# Zeppelin Tønder

Giants of the Air - Great War

# Zeppelin Tønder

- A visionary venture

**The project shows a picture of a visionary venture with great potential. It is the creation of an international scale experience and dissemination center.**

- The center must be leading in the field of experience and dissemination of World War I and Zeppelin, including other World War I aviation.
- Zeppelin Tønder holds a world-unique position with historical ancient monuments of the giant zeppelin halls and one of the few remaining and best-preserved World War I aircraft hangars.
- It is the great stories that are to be disseminated in the context of the world history at the Zeppelin base in Tønder. It is the link to the Great War and the Northern Europe epicenter in Tønder that is to be told and provide the historically great experience.
- It is the story of the world history's first aircraft attack from aircraft carrier against land installations and Northern Europe's largest building with the gigantic Toska Hall.
- It is also the story of place-bound qualities in the region in relation to world cultural heritage in the borderland with peaceful coexistence, UNESCO world heritage in the nearby marsh and wadden sea area, etc.
- A visit will generate enthusiasm, fascination, inspiration and reflection with great stories and with design and architectural framework in a spectacular format.
